VIRGINIA WOMEN'S SHELTER LAW

### **Testimony on behalf of keeping women's shelters female-only**

Hi there, good evening everybody. Council Members.

A long-term study conducted in Sweden suggests that transwomen commit violent crime at 1800% the rate as women in the general population do. Further, transwomen commit crime in general at 660% the rate as women in the general population do.

<https://fairplayforwomen.com/criminality/>

In England, transwomen can be incarcerated in women's prisons. Half of the transwomen prisoners who declared themselves transgender in 2019 have been sentenced with one or more sexual offences. <https://fairplayforwomen.com/transgender-male-criminality-sex-offences/>

Some sex-segregated spaces protect women from sex pests. There were 134 complaints of sexual assault taking place in changing rooms in UK public pools in 2017. Of these 134 sexual assaults including voyeurism, harassment, and rape, 14 took place in single-sex changing rooms, whereas 120 incidents took place in mixed/unisex changing facilities. <https://www.independent.co.uk/life-style/women/sexual-assault-unisex-changing-rooms-sunday-times-women-risk-a8519086.html>

In mental health wards in the UK, sexual assault is 3.5 times more prevalent in mixed sex wards than in single sex wards. <https://www.independent.co.uk/news/health/nhs-sexual-assault-patients-mental-health-mixed-sex-wards-a9273656.html>

In Yale Law & Policy Review, 37, Article 227, "Sexism in the bathroom debates: How bathrooms really became separated by sex," author W. B. Carter explained that "a key purpose of sex-separation in bathrooms was to protect women and girls from sexual harassment and sexual assault in the workplace and other venues," (p. 229) and argued that "laws requiring sex-separation in bathrooms were among the earliest noncriminal, anti-sexual harassment statutes passed in the nation" (p. 239). <https://digitalcommons.law.yale.edu/cgi/viewcontent.cgi?article=1733&context=ylpr>

To quote Callie H. Burt, “To be clear, I am not arguing that gender self-ID will usher in a sweeping epidemic of violence against females, nor am I suggesting that transwomen pose a particular danger to women and girls. Rather, I am correcting false claims that concerns about predation are fanciful and will never happen and that gender ID policies will cause no harm to females—they already have. Instead, like Stock ([

, I object to letting “even small numbers of females be the automatic collateral in sweeping social changes such as those proposed”.”

## TRANSHUMANISM-->TRANSGENDERISM

interview excerpt with another tech writer, “Valkyrie Ice” (Pellissier, 2012):

Interviewer: What in your opinion are the mutual interests of transgenderism and transhumanism?

Valkyre Ice: At its heart, I see both as about embracing change.  
 As a transsexual, I suffered from a genetic mix-up that resulted in a feminized brain inhabiting a masculinized body.  
 In the past, there was no way to change this.  
 The technology simply did not exist to enable a physical change to be made and allow this error to be corrected.  
 Now, it does. I can change my body to be a match with my brain.

In much the same way, the human being has been relatively unchanged for thousands of years,  
 our physical shells unable to match the adaptivity of our brains,  
 and the rapid evolution of our social and mental structures.  
 Our knowledge and culture has advanced by leaps and bounds,  
 while our bodies are still chained to the slow pace of biological evolution.  
 We’ve been trapped by our DNA as a species in the exact same manner  
 I have been trapped by mine in a physical shell that does not mirror our inner selves.  
 And just like the technology now exists to change my body,  
 so too will we soon have the technology to allow all of humanity  
 to bypass random mutation and become a self directed, consciously evolving being.

So, as a transgender, I am merely a singular example of the transformation humanity itself will undergo as we move out of the era of limits, and into the era of limitlessness.

Yet despite this fact, society is much slower to accept that such corrections are possible.

Even with all the advances made by transgenders over the last few decades, I still have to deal with people who flat out refuse to accept transgendered individuals on the basis of their mental self identity, but must instead insist that I act “male”.

I cannot even count the number of times I’ve been told to “act like a man!”

with the person telling me this acting like I’ve committed some crime by daring to not meet their expectations of what I should act like.

When I reveal to many people my further desires to be a succubus, and can even tell them precisely why I see it being a strong possibility, even many transhumans dismiss it as fantasy.

It’s this struggle to open societies eyes to the changing reality that the future is bringing that makes being transgender and being transhuman inseparable to me

. . . . More than anything else, H+ is about CHOICE.

It is about enabling humanity to choose what it will be, rather than passively accept the dictates of biology and random evolution.

It embraces those who have overcome limits, who have chosen to ignore society’s demands that we “not rock the boat.”

To BE H+, we have to believe that we have the ability to improve, to change, to become something other than what we were, or are.

As transgenders, we are merely precursors of the changes that humanity will have to face as we enter into a future of unlimited choice.

Soon, we will have the ability to change nearly every aspect of our physical selves, from gender to race, even to species.

Our right to be the sex we feel we should be is trivial compared to the right everyone should have to BE whatever they wish, be it elf or centaur, human or inhuman, or even biological or non.

If H+ cannot even accept transgenders on their own terms, how can they justify humanity’s right to even greater morphological freedoms? We cannot selectively fight for one, and deny another.”
